PROFESSIONAL SUMMARY

Front-End Engineer with hands-on experience building modern, scalable web applications using React.js, Next.js, TypeScript, and JavaScript. Skilled in developing responsive user interfaces, integrating RESTful APIs, implementing authentication and authorization systems, and creating maintainable full-stack applications using Next.js frontend and backend capabilities. Passionate about clean code, performance optimization, and continuously learning modern web technologies.

PROJECTS & EXPERIENCE

Rahhal - AI-Powered Travel & Social Platform

• Tech: React, TypeScript, Tailwind CSS, Bootstrap, Zustand, React Hook Form (Frontend) – ASP.NET Core (Backend)

• **Project Overview:** A comprehensive travel companion and social media platform that connects travelers, generates AI-driven personalized itineraries, and matches users based on shared travel preferences.

Key Contributions & Features (Frontend):

- Developed a **Full Social Media Feed & Interaction System** enabling users to share travel experiences, create media posts, and interact via likes/comments.
- Built the **AI Travel Planner & Plan Matching interface**, rendering responsive dynamic itineraries and calculating compatibility percentages between travel groups.
- Implemented secure **Profile Management and Direct Messaging systems** using real-time communication protocols.
- Integrated complex forms with advanced validation using **React Hook Form** and managed global application state efficiently using **Zustand**.
- Optimized UI performance and asset delivery, ensuring a minimalist, fast, and cinematic user experience across web and mobile viewports.
